SUMMARY

Engineering student who turns real-world problems into working software, with a focus on accessibility and worker safety. Combines full-stack development with AI, IoT and hardware to build solutions that are practical, usable and live. Looking for an opportunity to contribute to a team building products with real impact.

EDUCATION

MIT Academy of Engineering, Pune - B.Tech, Computer Engineering | **CGPA: 9.13** **Sep 2024 - Present**

Matoshree Junior College, Nashik - HSC | **93.17%** | Female District Topper **2023 - 2024**

St. Francis High School, Nashik - SSC | **95%** **2021 - 2022**

EXPERIENCE

Summer Intern (SIP), Dept. of First Year Engineering, MITAOE *(Mentor: Puja Verma)* **Jun 2026 - Aug 2026**

- Built the first-year timetable for the department as part of a 2-month Summer Internship Program.
- Developed the campus website featuring a 3D campus model, admin login, club information and college navigation.

TECHNICAL SKILLS

- **Languages:** C++, Java, JavaScript, Python
- **Frameworks:** React, Node.js, Express.js, Flask
- **Tools and Platforms:** Git, GitHub, Postman, Bash, Arduino
- **Concepts:** Computer Vision, IoT Sensor Integration, REST APIs

PROJECTS

SafeDrain: AI and IoT Safety Platform for Sanitation Workers | GitHub | Live Demo

- Developed a real-time safety platform for sanitation workers in hazardous sewer environments with live GPS tracking, gas monitoring, SOS alerts and a supervisor dashboard.
- Integrated AI-based pre-entry risk prediction with IoT sensor monitoring to help prevent accidents and speed up emergency response.
- **Stack:** React, Vite, Capacitor (Android).

AI-Powered A* Maze Solver Robot | GitHub

- Built an autonomous robot system that detects a maze using computer vision, computes the shortest path with the A* algorithm and navigates wirelessly.
- **Stack:** Computer Vision, A* Pathfinding, React, Flask, Arduino.

Automated Timetable Scheduler | Smart India Hackathon 2025 | LiveDemo

- Developed a website that automatically generates timetables, concepts used: CP-SAT, genetic algorithm

HBTM / IABTM: Personal Growth Media Platform | GitHub

- Built a full-stack web app with a Next.js frontend and FastAPI backend that stores users, goals, identity data, media and interactions in SQLite, plus a browser-tracker extension.
- Integrated YouTube, Spotify, Reddit and Pinterest APIs to serve live curated media through a “Get more like this” feature, keeping API keys server-side.

ACHIEVEMENTS

- **2 Patents Filed:** Factorization Skill Kit and Probability Model, both for visually impaired students.
- **1st Runner-up:** HBTM Hackathon, sponsored by the I Am Better Than Me startup, at IIIT Pune.
- **SIH - WINNER 2025: Automated Timetable Scheduler**
- **Brand Ambassador:** MIT Academy of Engineering.

LEADERSHIP AND ACTIVITIES

- **Vice President**, Girl Script Club (current); previously Tech Team lead (SY).
- **President**, Knights of the Square Table (MITAOE Chess Club).
- **Ladies Representative**, FY B.Tech 2024–25; SY Ladies Representative 2025–26, ASSCET.
- **Languages:** English, Hindi, Marathi
